Data

Data is gathered from the NFLsavant.
I have tied the data of years 2009 to 2016 in one graph, to form a multiline graph.
You can switch through the different quarters to compare the amount of touchdowns.

Design

- Years are displayed in a different color.
- The crosshair displays detailed information
- Buttons can be pressed to show data from different quarters
- When lines are selected they will pop-out
    - Other lines will be reduced in opacity.
